dm-CLOUD

# Malaysia's Local Cloud for Enterprise Infrastructure

## INTRODUCING dm-CLOUD

dm-CLOUD is a secure and scalable cloud solution that helps businesses modernize their IT infrastructure with reliable resources, easy management, and flexible solutions for greater efficiency and faster digital transformation.

## Who is dm-CLOUD for?

- Businesses with sensitive data
- Businesses using on-premise infrastructure
- Businesses with limited IT resources
- Businesses concerned about cloud costs
- Businesses using multiple IT solutions

## CHALLENGES OF OTHER CLOUD

- Unpredictable Cloud Costs
- Data Sovereignty Concerns
- Complex Cloud Management
- Overseas Support Delays
- Vendor Lock-In

## WHAT YOUR BUSINESS GETS FROM dm-CLOUD

1. **Complete IT Solutions Integration**
   Go beyond cloud infrastructure by combining cloud with cybersecurity, backup, networking, Microsoft 365, and managed services.
2. **Managed Cloud Services**
   Reduce the burden on your IT team by letting experts manage your cloud environment.
3. **NO Egress Fee**
   Enjoy predictable cloud costs with no additional egress fees when transferring your data.
4. **Personalized Customer Service**
   Work with a dedicated team that understands your business instead of a one-size-fits-all support model.
5. **Malaysian Data Centres**
   Keep data closer to your business while supporting data residency and lower latency for local users.
6. **MYR Billing**
   Avoid USD exchange rate fluctuations and enjoy more predictable IT costs.
7. **Cloud Sovereignty**
   Keep your data secure and within Malaysian data centres for greater control, enhanced privacy, and easier compliance.
